

AZURE IN IROKO

This shower's half-circle structure makes it an object of decoration all by itself. The structure is composed of 2 panels held together by 4 wing screws, allowing quick and easy mounting/dismounting. The structure is made in Iroko wood. Iroko is a variety of very dense rot-proof wood, which likes the contact with the water. It is also called «aquatic wood». The grating with 80 cm diameter is embedded in the structure but it remains removable. 4 ground fastening brackets allow anchoring the shower in any kind of soil to assure a good stability. Equipped with a 20 cm stainless steel shower nozzle or an Xflat 20 cm as an option. Personalized fittings are offered as the double faucet for connection to Hot/Cold Water circuit, a footwash faucet set, a mixer or also a hand-held shower. It can indifferently be installed inside or outdoors.

Standard:

Equipped with a ¼ turn faucet, showerhead Xflat 20 cm diameter, grating 80 cm diam. and 4 brackets.

The optional fittings :

- * Showerhead ultra-flat diam. 30 cm
- * 2 ¼ turn faucets for hot and cold
- * Foottap equipment
- * Hand-held shower equipment
- * Equipment with a mixer (single knob) for hot and cold
- * Equipment with a mixer and diverter for hot and cold with handshower equipment
