

FOOT WASH STATION with MISTING UNIT IN STAINLESS STEEL 316 L ROUND SHAPE

The Round Foot wash Station in Brushed Stainless steel is equipped with a spray nozzle which spreads the water in the form of fog.
An explosion of freshness in 360 ° which will delight children.

The FOOTWASH STATION round shape with its 1m00 high is an alternative solution to the usual tall shower

The foot wash station, which is round and is 89 mm in diameter and 1m00 high takes up little space and enables very discreet installation. This station features two functions: the misting unit, which is operated using the ¼-turn tap, and the hand-held shower equipment, which enables you to shower or simply rinse yourself without getting your hair wet. The water sprayed by the misting unit diffuses the water as a mist and allows several children to enjoy it, while the water from the hand-held shower provides an extremely gentle sensation when it comes into contact with the skin like refreshing foam. Both functions operate independently.

The Foot Wash station is made in 316L marine grade brushed stainless steel

- 1m00 high
