

FOOTWASH UNIT IN IROKO HAUTEUR 1M00

Iroko is an exotic wood from Africa which takes on an appealing amber color in the sun. A beautifully proportioned, highly robust structure, with a 16cm wide façade and 24mm thick wood. Its 1.00m height makes it a great alternative solution to the traditional tall shower. It is compact, enabling you to install it discreetly. This unit is fitted with a contemporary 1/4 turn footwash faucet which serves as a water source and hand-held shower head. The water released by the little shower head provides an extremely gentle sensation to the skin, like being bathed in lots of refreshing soft foam.

Standard version:

Handshower equipment, contemporary footwash equipment and support attachment for installation on floor
