

## FOOT WASH STATION ROUND SHAPE IN BRUSHED STAINLESS STEEL 316 L

**1m00 HIGH**

**The Foot Rinse Station 1m00 high is an alternative solution to the usual tall shower**

We opted to use **316L quality stainless steel**, which can withstand a harsh marine environment, ruling out any risk of corrosion due to pitting. The brushed appearance sublimates the colour and the natural reflections given off by the stainless steel. A stainless steel structure offers a magnificent contrast in material with wood or stone and combines elegantly with the ambiances provided by contemporary structures. Round in shape diam. 89 mm, it takes up little space and enables very discreet installation. This station is fitted with a hand-held shower and a foot-rinse tap. The water sprayed by the small showerhead provides an extremely gentle sensation when it comes into contact with the skin like refreshing foam.

The shower can be connected directly from behind or underneath to a garden hose or to an installed plumbing pipe system.
