

## INOX ROUND IN BRUSHED STAINLESS STEEL

Inox Round is a shower in brushed stainless steel, round shape with a diameter of 89 mm. We opted to use **316L quality stainless steel**, which can withstand a harsh marine environment, ruling out any risk of corrosion due to pitting. The brushed appearance sublimates the colour and the natural reflections given off by the stainless steel. A stainless steel structure offers a magnificent contrast in material with wood or stone and combines elegantly with the ambiances provided by contemporary structures.

The shower can be connected directly from behind or underneath (your choice) to a garden hose or to an installed pipe system. The shower is prepared accordingly.

### Standard :

Equipped with a ¼ turn faucet, Xlarge showerhead 15 cm diam. and a support attachment for terrace.
