

## PANAME ALU IN ZINC ALUMINIUM GREY COATED

For optimal protection, the shower PANAME ALU is coated using an aluminium grey colour. This treatment offers the major advantage of requiring minimum cleaning.

Optional fittings are offered: 2 ¼ turn faucets equipment providing hot and cold running water, a mixer equipment, a foot-wash equipment, or a hand-held shower equipment. Installation is quick and easy on all sorts of surfaces thanks to the anchoring components which come with it: A screw-down support for installation on a terrace made of wood, stone or concrete, and a “grass anchor” for installation directly onto a grassy surface in the garden.

The shower can be connected directly from behind or underneath (your choice) to a garden hose or to an installed pipe system. The shower is prepared depending on the options chosen.

### Standard :

Equipped with a ¼ turn faucet, showerhead 15 cm diam. and the base plate 15 x 15 cm for installation on terrace
