

PANAME PIERRE IN ZINC STONE COLOR COATED

Smooth, sculptured structure made from anthracite zinc, with a diameter of 100 mm for the vertical part and 60 mm for the horizontal part. The “stone” coated colour offers natural, long-term resistance to atmospheric corrosion. This treatment offers the major advantage of requiring minimum cleaning. The standard model is fitted with a ¼ turn faucet and showerhead diam. 15 cm. Additional optional fittings are offered. Installation is quick and easy on all sorts of surfaces thanks to the anchoring components: A screw-down support for installation on a terrace made of wood, stone, or concrete, and a “grass anchor” for installation directly onto a grassy surface in the garden.

Standard :

Equipped with a ¼ turn faucet, a 15 cm diam. showerhead and a base plate 15 cm x 15 cm for installation on terrace

Connection at the back base or underneath

Optional fittings :

Cold & warm water equipment

with 2 ¼ turn faucets

Hand-held shower equipment

Foot Wash equipment

Equipment with a mixer on the front

Xflat showerhead 15 cm diam.
