

PILOTIS IN PINE LOG

This shower is made from 100mm Northern Pine half logs. These have been treated in a class 4 autoclave, rendering them resistant to rot. The entire water supply system is hidden within the shower's interior. The PILOTIS shower offers the traditional shower function at a height of 2.20m, a foot-wash tap and a little water faucet to which you can attach a watering hose. A hand-held shower head is available as an optional fitting.

Available in 2 finishes: a NATURELLE or EBENE finish. Both of these finishes, natural and ebony, bring out the natural texture of the wood and ensure long-lasting protection against UV rays and bad weather.

Standard:

Equipped with a ¼ turn faucet, a foot wash equipment, a standard showerhead de Ø 15 cm and the terrace attachment support.

Optional fittings :

Handshower equipment
Cylindrical showerhead Ø15 cm
Xflat showerhead Ø 20 cm
Anchor for grass
Grating Ø 70 cm

Connection at the back base only

Total height: 2m 20
